The Fair Tax Book Neal Boortz 2006-05-02 Wouldn't you love to abolish the IRS ... Keep all the money in your paycheck ... Pay taxes on what you spend, not what you earn ... And eliminate all the fraud, hassle, and waste of our current system? Then the FairTax is for you. In the face of the outlandish American tax burden, talk-radio firebrand Neal Boortz and Congressman John Linder are leading the charge to phase out our current, unfair system and enact the FairTax Plan, replacing the federal income tax and withholding system with a simple 23 percent retail sales tax on new goods and services. This dramatic revision of the current system, which would eliminate the reviled IRS, has already caught fire in the American heartland, with more than six hundred thousand taxpayers signing on in support of the plan. As Boortz and Linder reveal in this first book on the FairTax, this radical but eminently sensible plan would end the annual national nightmare of filing income tax returns, while at the same time enlarging the federal tax base by collecting sales tax from every retail consumer in the country. The FairTax, they argue, would transform the fearsome bureaucracy of the IRS into a more transparent, accountable, and equitable tax collection system. Among other benefits, it will: Make America's tax code truly voluntary, without reducing revenue Replace today's indecipherable tax code with one simple sales tax Protect lower-income Americans by covering the tax on basic necessities Eliminate billions of dollars in embedded taxes we don't even know we're paying Bring offshore corporate dollars back into the U.S. economy Endorsed by scores of leading economists and supported by a huge and growing grassroots movement, the FairTax Plan could revolutionize the way America pays for itself. In this straight-talking book, Neal Boortz and John Linder show you how it would work—and how you can help make it happen.

EuroWordNet: A multilingual database with lexical semantic networks Piek Vossen 2013-11-11 This book describes the main objective of EuroWordNet, which is the building of a multilingual database with lexical semantic networks or wordnets for several European languages. Each wordnet in the database represents a language-specific structure

due to the unique lexicalization of concepts in languages. The concepts are inter-linked via a separate Inter-Lingual-Index, where equivalent concepts across languages should share the same index item. The flexible multilingual design of the database makes it possible to compare the lexicalizations and semantic structures, revealing answers to fundamental linguistic and philosophical questions which could never be answered before. How consistent are lexical semantic networks across languages, what are the language-specific differences of these networks, is there a language-universal ontology, how much information can be shared across languages? First attempts to answer these questions are given in the form of a set of shared or common Base Concepts that has been derived from the separate wordnets and their classification by a language-neutral top-ontology. These Base Concepts play a fundamental role in several wordnets. Nevertheless, the database may also serve many practical needs with respect to (cross-language) information retrieval, machine translation tools, language generation tools and language learning tools, which are discussed in the final chapter. The book offers an excellent introduction to the EuroWordNet project for scholars in the field and raises many issues that set the directions for further research in semantics and knowledge engineering.

**Contemporary Masculinities in the UK and the US** Stefan Horlacher 2017-09-13 This book is about ways to understand masculinity as systemic and corporeal, structural and performative all at once. It argues that the tension between an understanding of "masculinity" in the singular and "masculinities" in the plural poses a problem that can better be understood in relation to a concomitant tension: between systems on the one hand, and bodies on the other - between abstract structures such

as patriarchy, kinship or even language, and the various concrete forms taken by gendered, individuated corporeality. The contributions collected here investigate how masculinities become apparent, how they take shape and what systemic functions they have. What, they ask, are the relations between the abstract and corporeal, metaphorical and metonymic manifestations of masculinity? How are we to understand masculinity as a simultaneously systemic and corporeal, performative concept?
