**The Warren Buffett Way** Robert G. Hagstrom 2013-09-13 Warren Buffett is the most famous investor of all time and one of today's most admired business leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of The Warren Buffett Way gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor - just like Buffett Why "loss aversion", the tendency of most investors to overweight the pain of losing money, is one of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett's approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.

**The Nun** Simonetta Agnello Hornby 2012-01-31 August 15, 1839. Messina, Italy. In the home of Marshall don Peppino Padellani di Opiri, preparations for the feast of the Ascension are underway, but for Agata, the Marshall's daughter, there are more important matters at hand. She and the wealthy Giacomo Lepre have fallen in love. Her mother, however, is determined that the two young people will not marry. When, one month later, Marshall don Peppino dies, Agata's mother decides to ferry her daughter away from Messina, to Naples, where she hopes to garner a stipend from the king and keep her daughter far from trouble's reach. They travel to Naples on a boat captained by the young Englishman, James Garson. Following a tempestuous passage to Naples, during which Agata confesses her troubles to James, Agata and her mother find themselves rebuffed by the king and Agata is forced to join a convent. The Benedictine monastery of San Giorgio Stilita is rife with rancor and jealousy, illicit passions and ancient feuds. Agata remains aloof, devoting herself to the cultivation of medicinal herbs, calmed by the steady rhythms of monastic life. Through letters she stays in contact with Garson, reading all the books he sends her, and follows the news of the various factions struggling to bring unity to Italy. Though she didn't choose to enter a convent and is divided between her yearnings for purity and religiosity and her desire to be part of the world, something about the cloistered life reverberates within her. Agata is increasingly torn when she realizes that her feelings for Garson, though he is only a distant presence in her life, have eclipsed those for Lepre. A Mediterranean sister to the heroines of Jane Austen and Emily Brontë, Agata fully inhabits her own time yet in Agnello Hornby's rich characterization, she also embodies strength of will and a spiritual fortitude that is timeless.

**Production Culture** John Thornton Caldwell 2008-03-25 In Production Culture, John Thornton Caldwell investigates the cultural practices and belief systems of Los Angeles-based film and video production workers: not only those in prestigious positions such as producer and director but also many others, including gaffers, editors, and camera operators. Borrowing insights from cultural anthropology, Caldwell analyzes the stories workers tell and the rituals they enact to make sense of their labour and to critique the film and TV industry and the culture writ large. Far from being guarded, Hollywood executives and craftspeople work within an industry that obsessively reflects on itself and constantly exposes itself to the public. Caldwell suggests ways that scholarship might benefit by acknowledging the extent to which the industry first theorizes and critiques itself as part of economic and industrial habit. Caldwell's fieldwork combines interviews with industry workers; observations of sets and workplaces; and analyses of TV shows, industry documents, economic data, and promotional materials to show how film and video workers function in a radically transformed and unstable post-network industry. He chronicles how industry workers have responded to volatile changes including the convergence of "old" and "new" media; labour outsourcing; increasingly unruly labour and business relations; new production technologies; and multinational corporate conglomeration. He also explores new struggles over "authorship" within collective creative endeavours; the way that branding and syndication have become central business strategies for networks; and the "viral" use of industrial self-reflexivity to motivate consumers through DVD bonus tracks, behind-the-scenes documentaries, and "making-ofs." A significant, on-the-ground analysis of an industry in flux, Production Culture offers scholars new, more precise and holistic ways of thinking about media production as a cultural activity.

**The Philosophy of Film Noir** Mark T. Conard 2007-08-17 From The Maltese Falcon (1941) to Touch of Evil (1958), the classic film noir is easily recognizable for its unusual lighting, sinister plots, and feeling of paranoia. For critics and fans alike, these films defined an era. The Philosophy of Film Noir explores philosophical themes and ideas inherent in classic noir and neo-noir films, establishing connections to diverse thinkers ranging from Camus to the Frankfurt School. The authors, each focusing on a different aspect of the genre, explore the philosophical underpinnings of classic films such as The Big Sleep (1946), Out of the Past (1947), and Pulp Fiction (1994). They show how existentialism and nihilism dominate the genre as they explore profound themes in a vital area of popular culture.

**Monetary Theory and the Trade Cycle** F. A. Hayek 2012-07-01 2012 Reprint of 1932 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. This essay is one of the important early works that together "represent the first integration and systematic elaboration of the Austrian theories of money, capital, business cycles, and comparative monetary institutions, which constitute the essential core of Austrian macroeconomics. Indeed these works have profoundly influenced postwar expositions of Austrian or "capital-based" macroeconomics down to the present day. The creation of such an oeuvre would be a formidable intellectual feat over an entire lifetime; it is an absolute marvel when we consider that Hayek had completed it in the span of eight years (1929-1937) and still well shy of his fortieth birthday." -- Joseph T. Salerno

**TV Horror** Lorna Jowett 2013-01-18 Horror is a universally popular, pervasive TV genre, with shows like True Blood, Being Human, The Walking Dead and American Horror Story making a bloody splash across our television screens. This complete, utterly accessible, sometimes scary new book is the definitive work on TV horror. It shows how this most adaptable of genres has continued to be a part of the broadcast landscape, unsettling audiences and pushing the boundaries of acceptability. The authors demonstrate how TV Horror continues to provoke and terrify audiences by bringing the monstrous and the supernatural into the home, whether through adaptations of Stephen King and classic horror novels, or by reworking the gothic and surrealism in Twin Peaks and Carnivale. They uncover horror in mainstream television from procedural dramas to children's television and, through close analysis of landmark TV auteurs including Rod Serling, Nigel Kneale, Dan Curtis and Stephen Moffat, together with case studies of such shows as Dark Shadows, Dexter, Pushing Daisies, Torchwood, and Supernatural, they explore its evolution on television. This book is a must-have for those studying TV Genre as well as for anyone with a taste for the gruesome and the macabre.

**Financial Engineering and Arbitrage in the Financial Markets** Robert Duhil 2011-10-13 A whole is worth the sum of its parts. Even the most complex structured bond, credit arbitrage strategy or hedge trade can be broken down into its component parts, and if we understand the elemental components, we can then value the whole as the sum of its parts. We can quantify the risk that is hedged and the risk that is left as the residual exposure. If we learn to view all financial trades and securities as engineered packages of building blocks, then we can analyze in which structures some parts may be cheap and some may be rich. It is this relative value arbitrage principle that drives all modern trading and investment. This book is an easy-to-understand guide to the complex world of today's financial markets teaching you what money and capital markets are about through a sequence of arbitrage-based numerical illustrations and exercises enriched with institutional detail. Filled with insights and real life examples from the trading floor, it is essential reading for anyone starting out in trading. Using a unique structural approach to teaching the mechanics of financial markets, the book dissects markets into their common building blocks: spot (cash), forward/futures, and contingent (options) transactions. After explaining how each of these is valued and settled, it exploits the structural uniformity across all markets to introduce the difficult subjects of financially engineered products and complex derivatives. The book avoids stochastic calculus in favour of numeric cash flow calculations, present value tables, and diagrams, explaining options, swaps and credit derivatives without any use of differential equations.

**The Age of Cryptocurrency** Paul Vigna 2015-01-27 Bitcoin became a buzzword overnight. A cyber-enigma with an enthusiastic following, it pops up in headlines and fuels endless media debate. You can apparently use it to buy almost anything from coffee to cars, yet few people seem to truly understand what it is. This raises the question: Why should anyone care about Bitcoin? In THE AGE OF CRYPTOCURRENCY, Wall Street journalists Paul Vigna and Michael J. Casey deliver the definitive answer to this question. Cybermoney is poised to launch a revolution, one that could entirely re-invent traditional financial and social structures while bringing the world's billions of "unbanked" individuals into a new global economy. Cryptocurrency represents the promise of a financial system without a middleman, one owned by the people who use it and one safeguarded from the devastation of a 2008-type crash. But bitcoin, the most famous of the cybermonies, brings with it a reputation for instability, wild fluctuation, and illicit business; some fear it has the power to eliminate jobs and to upend the concept of a nation-state. It implies, above all, monumental and wide-reaching change—for better and for worse. But it is here to stay, and you ignore it at your peril. Vigna and Casey demystify the concept of cryptocurrency, detailing its origins, its function, and what you need to know to navigate a cyber-economy. The digital currency world will look very different from the paper currency world; THE AGE OF CRYPTOCURRENCY will teach you how to be ready for it.

**With Liberty for Some** Scott Christianson 2000-10-19 From Columbus' voyages to the New World through today's prison expansion movements, incarceration has played an important, yet disconcerting, role in American history. In this sweeping examination of imprisonment in the United States over five centuries, Scott Christianson exposes the hidden record of the nation's prison heritage, illuminating the forces underlying the paradox of a country that sanctifies individual liberty while it continues to build and maintain a growing complex of totalitarian institutions. Based on exhaustive research and the author's insider's knowledge of the criminal justice system, *With Liberty for Some* provides an absorbing, well-written chronicle of imprisonment in its many forms. Interweaving his narrative with the moving, often shocking, personal stories of the prisoners themselves and their keepers, Christianson considers convict transports to the colonies; the international trade in captive indentured servants, slaves, and military conscripts; life under slavery; the transition from colonial jails to model state prisons; the experience of domestic prisoners of war and political prisoners; the creation of the penitentiary; and the evolution of contemporary corrections. His penetrating study of this broad spectrum of confinement reveals that slavery and prisons have been

inextricably linked throughout American history. He also examines imprisonment within the context of the larger society. *With Liberty for Some* is a thought-provoking work that will shed new light on the ways in which imprisonment has shaped the American experience. As the author writes, "Prison is the black flower of civilization -- a durable weed that refuses to die."

**The Black Swan** Nassim Nicholas Taleb 2007-04-17 The Black Swan is a standalone book in Nassim Nicholas Taleb's landmark *Incerto* series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are *Fooled by Randomness*, *Antifragile*, and *The Bed of Procrustes*. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay, "On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, *The Black Swan* will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. *The Black Swan* is a landmark book—itsself a black swan. Praise for Nassim Nicholas Taleb "The most prophetic voice of all."—GQ Praise for *The Black Swan* "[A book] that altered modern thinking."—The Times (London) "A masterpiece."—Chris Anderson, editor in chief of *Wired*, author of *The Long Tail* "Idiosyncratically brilliant."—Niall Ferguson, *Los Angeles Times* "The Black Swan changed my view of how the world works."—Daniel Kahneman, Nobel laureate "[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy."—The Wall Street Journal "Hugely enjoyable—compelling . . . easy to dip into."—Financial Times "Engaging . . . The Black Swan has appealing cheek and admirable ambition."—The New York Times Book Review From the Hardcover edition.

**Farewell, Ghosts** Nadia Terranova 2020-08-25 This award-winning novel about a woman facing her past introduces Terranova to English-speaking audiences. Translated by Ann Goldstein, translator of Elena Ferrante's Neapolitan quartet. Finalist, Premio Strega, 2019 | Winner, Premio Alassio Centolibrì | Selected among the 10 Best Italian Books of 2018 by *Corriere della Sera* Ida is a married woman in her late thirties, who lives in Rome and works at a radio station. Her mother wants to renovate the family apartment in Messina, to put it up for sale and asks her daughter to sort through her things—to decide what to keep and what to throw away. Surrounded by the objects of her past, Ida is forced to deal with the trauma she experienced as a girl, twenty-three years earlier, when her father left one morning, never to return. The fierce silences between mother and daughter, the unbalanced friendships that leave her emotionally drained, the sense of an identity based on anomaly, even the relationship with her husband, everything revolves around the figure of her absent father. Mirroring herself in that absence, Ida has grown up into a woman dominated by fear, suspicious of any form of desire. However, as her childhood home besieges her with its ghosts, Ida will have to find a way to break the spiral and let go of her father finally. Beautifully translated by Ann Goldstein, who also translated Elena Ferrante's Neapolitan quartet, *Farewell, Ghosts* is a poetic and intimate novel about what it means to build one's own identity.
