Self-Action Leadership (Volume I) Jordan R. Jensen 2019-08-30 Self-Action Leadership (Volumes 1 and 2) provides the first, and only, books of their kind in the academic world today. This two volume set single-handedly carves out a new and unique scholarly niche by providing the first comprehensive and secular manual to holistically address society's universal need for personal leadership and character education. Its single-minded aim is the global promotion and proliferation of leadership, character, and life skills education in nations, communities, organizations, schools, homes, and individual lives everywhere. The concept of Self-Action Leadership (SAL) is rooted in 30 years of extensive research spanning the fields of self-leadership, leadership, action research, character education, and autoethnography. In addition to drawing on the scholarship of these extant fields, SAL simultaneously builds upon them by introducing an original theory and model that executives, administrators, scholars, teachers, and practitioners alike can universally utilize to their own advantages and to the benefit of their colleagues, subordinates, and students. Volume I–The Self-Action Leadership Theory–contains prefacing material for the combined texts. It also includes the first four book sections of the two volume set.

The Handbook of Linguistics Mark Aronoff 2020-01-07 "The first edition of this Handbook is built on surveys by well-known figures from around the world and around the intellectual world, reflecting several different theoretical predilections, balancing coverage of enduring questions and important recent work. Those strengths are now enhanced by adding new chapters and thoroughly revising almost all other chapters, partly to reflect ways in which the field has changed in the intervening twenty years, in some places radically. The result is a magnificent volume that can be used for many purposes." David W. Lightfoot, Georgetown University "The Handbook of Linguistics, Second Edition is a stupendous achievement. Aronoff and Rees-Miller have provided overviews of 29 subfields of linguistics, each written by one of the leading researchers in that subfield and each impressively crafted in both style and content. I know of no finer resource for anyone who would wish to be better informed on recent developments in linguistics." Frederick J. Newmeyer, University of Washington, University of British Columbia and Simon Fraser University "Linguists, their students, colleagues, family, and friends: anyone interested in the latest findings from a wide array of linguistic subfields will welcome this second updated and expanded edition of The Handbook of Linguistics. Leading scholars provide highly accessible yet substantive introductions to their fields: it's an even more valuable resource than its predecessor." Sally McConnell-Ginet, Cornell University "No handbook or text offers a more comprehensive, contemporary overview of the field of linguistics in the twenty-first century. New and thoroughly updated chapters by prominent scholars on each topic and subfield make this a unique, landmark publication." Walt Wolfram, North Carolina State University This second edition of The Handbook of Linguistics provides an updated and timely overview of the field of linguistics. The editor's broad definition of the field ensures that the book may be read by those seeking a comprehensive introduction to the subject, but with little or no prior knowledge of the area. Building on the popular first edition, The Handbook of Linguistics, Second Edition features new and revised content reflecting advances within the discipline. New chapters expand the already broad

coverage of the Handbook to address and take account of key changes within the field in the intervening years. It explores: psycholinguistics, linguistic anthropology and ethnolinguistics, sociolinguistic theory, language variation and second language pedagogy. With contributions from a global team of leading linguists, this comprehensive and accessible volume is the ideal resource for those engaged in study and work within the dynamic field of linguistics.
