The Ancient Origins of Consciousness Todd E. Feinberg 2017-09-08 How consciousness appeared much earlier in evolutionary history than is commonly assumed, and why all vertebrates and perhaps even some invertebrates are conscious. How is consciousness created? When did it first appear on Earth, and how did it evolve? What constitutes consciousness, and which animals can be said to be sentient? In this book, Todd Feinberg and Jon Mallatt draw on recent scientific findings to answer these questions—and to tackle the most fundamental question about the nature of consciousness: how does the material brain create subjective experience? After assembling a list of the biological and neurobiological features that seem responsible for consciousness, and considering the fossil record of evolution, Feinberg and Mallatt argue that consciousness appeared much earlier in evolutionary history than is commonly assumed. About 520 to 560 million years ago, they explain, the great “Cambrian explosion” of animal diversity produced the first complex brains, which were accompanied by the first appearance of consciousness: simple reflexive behaviors evolved into a unified inner world of subjective experiences. From this they deduce that all vertebrates are and have always been conscious—not just humans and other mammals, but also every fish, reptile, amphibian, and bird. Considering invertebrates, they find that arthropods (including insects and probably crustaceans) and cephalopods (including the octopus) meet many of the criteria for consciousness. The obvious and conventional wisdom—shattering implication is that consciousness evolved simultaneously but independently in the first vertebrates and possibly arthropods more than half a billion years ago. Combining evolutionary, neurobiological, and philosophical approaches allows Feinberg and Mallatt to offer an original solution to the “hard problem” of consciousness.

The Ancestor Syndrome Anne Ancelin Schutzenberger 2014-02-25 In **The Ancestor Syndrome** Anne Ancelin Schutzenberger explains and provides clinical examples of her unique psychogenaeological approach to psychotherapy. She shows how, as mere links in a chain of generations, we may have no choice in having the events and traumas experienced by our ancestors visited upon us in our own lifetime. The book includes fascinating case studies and examples of 'genosociograms' (family trees) to illustrate how her clients have conquered seemingly irrational fears, psychological and even physical difficulties by discovering and understanding the parallels between their own life and the lives of their forebears. The theory of 'invisible loyalty' owed to previous generations, which may make us unwittingly re-enact their life events, is discussed in the light of ongoing research into transgenerational therapy. Anne Ancelin Schutzenberger draws on over 20 years of experience as a therapist and analyst and is a well-respected authority, particularly in the field of Group Therapy and Psychodrama. First published as Aie, mes Aieux this fascinating insight into a unique style of clinical work has already sold over 32,000 copies in France and will appeal to anyone working in the psychotherapy profession.

Connect with Your Ancestors: Transforming the Transgenerational Trauma of Your Family Tree Patricia Kathleen Robertson 2017-12-09 Connect With Your Ancestors provides hope for anyone frustrated with a lack of answers for their symptoms, conditions and repetitive life challenges. Do you experience unexplainable fears; feelings of grief, anger or shame; addictions; relationship challenges; anxiety or depression; burnout or chronic health conditions? These are some of the ways that descendants carry transgenerational trauma for their ancestors. This book reflects upon how to recognize the transgenerational trauma you might be carrying for your parents, grandparents and ancestors, and provides body focused ways to address it. If you repeatedly explore different medical treatments, therapies or alternative healing techniques, yet remain stuck in life in some way; there is a strong likelihood that you are entangled with someone or something in your family system that is emotionally unresolved. My family system had plenty of transgenerational trauma to address and yours might too. War, immigration, displacement, family tragedy, birth trauma, adoption, exclusion or religious persecution are some of the transgenerational trauma experiences that transmit from generation to generation. Silence is a profound carrier of transgenerational trauma in many family systems. If you know very little about your ancestors than the transgenerational trauma has likely been silenced. Family secrets or traumatizing experiences that are silenced take on a life of their own. They live on in the unconscious body of family members waiting to be addressed. The impact on living generations becomes more powerful with each generation of silence. This book is a compilation of blog entries (aka small essays) on topics of transgenerational trauma and systemic healing. It engages with the insight that is found through systemic and family constellations, emphasizing the need for energetic body focused systemic healing approaches. It is the first in a series of books that will be made available shortly on numerous systemic healing topics. Our ancestors didn't have access to the knowledge about systemic healing that we are developing today. What the ancestors suppressed emotionally, going on stoically as if everything was fine, may be a template for your life. Any transgenerational trauma or inherited trauma that you don't address may be passed down to your children and grandchildren through their pre- and perinatal experiences, epigenetically, through collective memory or culturally in the cells of their body. Most of you carry either subtle or blatant unresolved family emotional wounds or trauma as energetic entanglements and it may be holding you back in life. You may be surprised to learn that you unconsciously sacrificed yourself out of love and loyalty for your greater family system to carry a wound, trauma or imbalance that needed to be acknowledged, addressed and healed. This book covers topics such as systemic healing, emotional entanglement, radical inclusion, emotional wounds for men, relationships with father, chronic illness, belonging in the family, ungrounded fears, living in agency, give and take in relationships, intimate relationships and body focused ritual practices for healing. In the rapidly changing technological world we live in today, our mind, body, heart and spirit are struggling to keep up with the wild pace. We desire healthy emotional response patterns and ways to quickly work through our emotional issues and the issues we carry for our ancestors. This book provides examples of transgenerational trauma and systemic healing for the walking wounded, all the healers and helpers of the world, the victims and perpetrators, the colonized and colonizers, the genealogists who continue to search and the many clients and patients who go from practitioner to practitioner searching for answers. Connect With Your Ancestors was written for you and I, and for our children and grandchildren.

Intensive Family Therapy Ivan Boszormenyi-Nagy 2013-06-17 The chapters of this volume were written for the purpose of surveying the field of intensive family therapy. The book is not a compilation of previously published articles; all of the chapters are original contributions written at the request of the editors. The structure of the volume was determined by the editors' experience with family therapy and their continuous exchange with other workers in the field through symposia, personal discussions, and, in most cases, direct observation of their work.

Essentials of Human Memory (Classic Edition) Alan Baddeley 2013-07-31 This Classic Edition of the best-selling textbook offers an in-depth overview of approaches to the study of memory. With empirical research from both the real world and the neuropsychological clinic, the book explains the fundamental workings of human memory in a clear and accessible style. This edition contains a new introduction and concluding chapter in which the author reflects on how the book is organized, and also on how the field of memory has developed since it was first published. Essentials of Human Memory evolved from a belief that, although the amount we know about memory has increased enormously in recent years, it is still possible to explain it in a way that would be fully understood by the general reader. After a broad overview of approaches to the study of memory, short-term and working memory are discussed, followed by learning, the role of organizing in remembering and factors influencing forgetting, including emotional variables and claims for the role of repression in what has become known as the false memory syndrome. The way in which knowledge of the world is stored is discussed next, followed by an account of the processes underlying retrieval, and their application to the practical issues of eyewitness testimony. The breakdown of memory in the amnesic syndrome is discussed next, followed by discussion of the way in which memory develops in children, and declines in the elderly. After a section concerned with mnemonic techniques and memory improvement, the book ends with an overview of recent developments in the field of human memory. Written by the leading expert in human memory, recently awarded the British Psychological Society Research Board Lifetime Achievement Award, Essentials of Human Memory will be of interest to students of Cognitive Psychology, Neuropsychology, and anyone with an interest in the workings of memory.

Creating the Work You Love Rick Jarow 1995-11-01 In this unique and provocative look at work, career counselor Rick Jarow argues for a return to the concept of vocation—finding a “calling” instead of a job. Traditional career guides inventory the individual skills, talents, and abilities that correlate to specific existing jobs. Creating the Work You Love presents a unique alternative approach, using self-reflective exercises based on the seven chakras, to help you determine the elements you need to create a life filled with meaning and purpose. Jarow believes that it is possible to live and act from the most authentic part of ourselves, and to express our strongest values, energies, and talents through our work in the world. Concentrating on the attributes associated with each of the body's energy centers, or chakras, Dr. Jarow helps us form a bridge between our personal priorities and the external activities of the work world. Once this bridge is established, strategies are developed to find a career that nourishes all aspects of our lives.

The Handbook of Psychodrama Marcia Karp 2005-06-20 This handbook provides a comprehensive introduction to the theory and practice of psychodrama for professional and trainee psychodramatists. Following an introduction to the history and philosophy of psychodrama the theory is then brought to life by detailed first-hand accounts of psychodrama sessions. The structure of the book innovatively reflects that of the classic psychodrama session - Warm Up, Action, Sharing and the subsequent Processing. Chapters on psychodrama in action include discussion on the new use of psychodrama in the treatment of depression, and the relationship of the discipline to other group psychotherapies. The contributors vividly illustrate the contribution dramatic improvisation can make to emotional health.

Girls Under Pressure Jacqueline Wilson 2008-09-04 Magda is tall and glamorous, Nadine is willowy and 'gothic'. And Ellie . . . well, Ellie is just plain normal. The three girls have been best friends forever, but now Ellie is convinced she's fat, Nadine wants to be a model, and Magda worries that her appearance is giving guys the wrong idea. The pressure is on for them to change the way they look - but can they learn to love themselves, just the way they are? **What Was I Thinking?** Jalal Toufic 2017-09-08 "What Was I Thinking?" is an initiation into thinking. With a mind that is extremely analytical and yet extremely capable of rendering all kinds of knowledge and experiences permeable to each other, Jalal Toufic creates here a 'summa,' but an open-ended one. He looks into the arts as if they were the privileged site of thinking, even when they inevitably fail, and still confronts his insights/thoughts with texts taken from the traditional religions and mystics of the past. He has reached in this work an Olympian attitude—tuned to his basically Dionysian temperament—that announces the beginning of a detachment, of a remarkable serenity (a joy in thinking that Nietzsche had already understood). Jalal Toufic is today, and has been for some time, the most original thinker on the planet. He assumes the challenge stated by Heidegger in What Is Called Thinking? by his own thinking (by writing this book). To imagine the best possible worlds, to go into uncharted territory: these worlds are eminently those of the arts (as he practices them, as he delves into their layers, their paradoxes, their darings, ever admitting their maddening inbuilt inaccessibility). His kind of an endeavor takes a tremendous courage. And a unique freedom: letting his mind go into unpredicted ascertainments, so that his writing 'does not fall apart two days later.' Situated somewhere close to the spirit of Einstein's General Theory of Relativity and Nietzsche's breakthroughs, we can say that Jalal Toufic is indeed a 'destiny.'" —Etel Adnan Series edited by Julieta Aranda, Brian Kuan Wood, Stephen Squibb, Anton Vidokle

Two Or Three Things I'm Dying to Tell You Jalal Toufic 2005 Cultural Writing. "What was Orpheus dying to tell his wife, Eurydice? What was Judy dying to tell her beloved, Scottie, in Hitchcock's Vertigo? What were the previous one-night wives of King Shahrayar dying to tell Shahrazad? What was the Christian God "dying" to tell us? What were the faces of the candidates in the 2000 parliamentary election in Lebanon "dying" to tell voters and nonvoters alike? While writing (Vampires): An Uneasy Essay on the Undead in Film and Undying Love, or Love Dies, I, a mortal to death, was dying to tell these books' readers and myself about diegetic silence-over, which produces a dead stop and reveals the occasional natural immobilization of the living as merely a variety of movement; and an unreality that sometimes behaves in a filmic manner, inducing the undead to wonder: "Am I in a film?"; as well as a significant number of other anomalies"—Jalal Toufic. "Resurrection through simulation-an end time fantasy in real time. The graves open... the dead walk...Toufic is a sort of postructuralist spiritualist, a critical medium for the peculiar specters that haunt the society of the spectacle." Ben Lerner "Jalal Toufic is an amazing writer. He documents the moves of consciousness in a way that leads the reader ever deeper, from impasse to illusion to new impasse turning the trap of what can't be named' into a true paradise." Richard Forema"

The MindBody Code Mario Martinez 2014-11-01 Why is it so difficult to change our beliefs and behaviors even when we know they no longer serve us? How can certain individuals reverse “incurable” disease while others suffer the effects of childhood wounds despite years of therapy? How is it that the centenarians make up the fastest-growing segment of the U.S. population—even though the majority of people over the age of 100 rarely visit their doctors? When Dr. Mario Martinez began his career in clinical neuropsychology, he was determined to find the answers to baffling questions like these. With *The MindBody Code*, he shares the rewards of an investigation that has spanned generations and cultures to reveal the most effective methods for initiating deep and lasting change—and the empowering new science of biocognition that substantiates their results. Far from a quick-fix approach, *The MindBody Code* will challenge you to embrace a bold paradigm for health and wellbeing that requires your courage, patience, and commitment. You will not only learn the basics of this cutting-edge science, you will learn to communicate with your body in its own “biosymbolic” language to begin making changes that till this point may have been elusive at best. Through fascinating case studies and practical training in embodying the methodology, Dr. Martinez illuminates: The overt and subtle ways our cultural beliefs impact our immune system—and the pathways to healing the archetypal wounds of shame, abandonment, and betrayal How to break through the ceilings of abundance that limit prosperity and create the “subcultures of wellness” that will help you reach your full potential Lessons from the centenarians—how to transform “aging consciousness” to continually increase your value and competence as you grow older Psychospiritual conflicts—getting to the root of challenges often mistaken as psychiatric disorders Why do so many popular methods of personal transformation fail despite our efforts and intentions? Because they don't address the mindbody code—your body's “operating instructions” for interpreting your world, creating your sense of self, and defining what's really possible for you. *The MindBody Code* is your key to safely and successfully confront your fears, disillusionment, and learned helplessness with tools that harness the hope, joy, and unconditional love you hold within. Course objectives: Explain the overt and subtle ways our cultural beliefs impact our immune system—and the pathways to healing the archetypal wounds of shame, abandonment, and betrayal Discuss how to break through the ceilings of abundance that limit prosperity and create the “subcultures of wellness” that will help you reach your full potential Utilize lessons from the centenarians—how to transform “aging consciousness” to continually increase your value and competence as you grow older Define psychospiritual conflicts—how to get to the root of challenges often mistaken as psychiatric disorders

Eyes to See Michael F. Land 2018-11-22 Vision is the sense by which we and other animals obtain most of our information about the world around us. Darwin appreciated that at first sight it seems absurd that the human eye could have evolved by natural selection. But we now know far more about vision, the many times it has independently evolved in nature, and the astonishing variety of ways to see. The human eye, with a lens forming an image on a sensitive retina, represents just one. Scallops, shrimps, and lobsters all use mirrors in different ways. Jumping spiders scan with their front-facing eyes to check whether the object in front is an insect to eat, another spider to mate with, or a predator to avoid. Mantis shrimps can even measure the polarization of light. Animal eyes are amazing structures, often involving precision optics and impressive information processing, mainly using wet protein - not the substance an engineer would choose for such tasks. In *Eyes to See*, Michael Land, one of the leading world experts on vision, explores the varied ways in which sight has evolved and is used in the natural world, and describes some of the ingenious experiments researchers have used to uncover its secrets. He also discusses human vision, including his experiments on how our eye movements help us to do everyday tasks, as well as skilled ones such as sight-reading music or driving. He ends by considering the fascinating problem of how the constantly shifting images from our eyes are converted in the brain into the steady and integrated conscious view of the world we experience.

Queen of Dreams Chitra Banerjee Divakaruni 2007-12-18 From the bestselling author of *Sister of My Heart* comes a spellbinding tale of mothers and daughters, love and cultural identity. Rakhi, a young painter and single mother, is struggling to come to terms with her relationship with ex-husband Sonny, a hip Bay Area DJ, and with her dream-teller mother, who has rarely spoken about her past or her native India. Rakhi has her hands full, juggling a creative dry spell, raising her daughter, and trying to save the Berkeley teahouse she and her best friend Belle own. But greater challenges are to come. When a national tragedy turns her world upside down and Rakhi needs her mother's strength and wisdom more than ever, she loses her in a freak car accident. But uncovering her mother's dream journals allows Rakhi to discover her mother's long-kept secrets and sacrifices—and ultimately to confront her fears, forge a new relationship with her father, and revisit Sonny's place in her heart.

The Other Presence Sifiso Nyati 2008 “The other presence is a novel that depicts and portrays beliefs, attitudes and viewpoints of African village people on the concept of death. The underlying belief is that, in African traditional set-ups, there is no death that occurs innocently. Behind every death, there is some form of mysterious work by either a sorcerer or a spell. Even in the situation where a Western clinic diagnoses a patient as a HIV carrier, the cause of the death of that person would have to be interrogated. The book illustrates how elder Sinvula, battles with the insinuations and accusations that he is responsible for the death of his nephew, Akapelwa. Ma Simanga, the bereaved mother has vowed not to leave a stone unturned. This time, she would stretch her trip to East Africa where answers would be given about the cause of her son's death. As in other deaths in her family, the pension payout from the deceased's contributions would be used to pay the seers.”–Page 4 of cover

Systemic Coaching and Constellations John Whittington 2020-08-13 Systemic Coaching and Constellations offers a refreshingly uncomplicated path into a potentially complex subject, demonstrating how to understand and manage intricate relationship systems as part of a powerful coaching agenda. It provides a comprehensive introduction to the principles that sustain systems, how to map and explore them through constellations, as well as a step-by-step guide to integrating these principles and practices into coaching. Featuring a variety of case studies from around the world to illustrate different facilitation styles and approaches, it also contains practical exercises which can be used in a variety of contexts, including one-to-one coaching, group coaching, leadership development coaching and managing conflict in teams. This updated third edition of Systemic Coaching and Constellations contains a new chapter on systemic supervision, new material on team coaching, systemic questions and resourcing constellations as well as new and refreshed case studies and updates to wider research and thinking. Whether used in an initial selection meeting or to underpin all coaching conversations and interventions, it remains an indispensable resource for coaches of all levels of experience and in all remits looking to transform their practice, as well as for those studying coaching as part of a degree or coaching qualification.

I Carry Your Heart in My Heart Dan Booth Cohen 2009 The prisoners in I Carry Your Heart in My Heart are serving long-term sentences for violent crimes, mostly life - without the possibility of parole - for murder. They represent society's ultimate outcasts, personifying evil brought to justice. Sharing Family Constellations with them is actually a great privilege. These men have gone through ordeals that we can only imagine and have worked to find a way to their souls. Systemic Family Constellations are unlike cognitive, behavioral, and interpersonal therapies in their origin, form, and purpose. Constellations succeed by diminishing the unconscious impulses that drive destructive behaviors. The process reaches the invisible clockworks of the mind and heart to reveal with astonishing specificity how individual problems nest within a larger tapestry shaped by ancestral family traumas. In a heartbeat, the patterns release, opening the mind to reverence for life and compassion for others. Problems that were frozen yield to new solutions. Dan Booth Cohen spent five years leading monthly Systemic Family Constellation circles with these prisoners. This book tells stories of these experiences. It also includes rigorously researched chapters that describe Family Constellations' historic roots and underlying philosophy.

Anchor Trouble Maud Newton 2022-03-29 “Extraordinary and wide-ranging . . . a literary feat that simultaneously builds and excavates identity.”—The New York Times Book Review (Editors' Choice) Roxane Gay's Audacious Book Club Pick • An acclaimed writer goes searching for the truth about her wildly unconventional Southern family—and finds that our obsession with ancestors opens up new ways of seeing ourselves—in this “brilliant mix of personal memoir and cultural observation” (The Boston Globe). Maud Newton's ancestors have vexed and fascinated her since she was a girl. Her mother's father, who came of age in Texas during the Great Depression, was said to have married thirteen times and been shot by one of his wives. Her mother's grandfather killed a man with a hay hook and died in an institution. Mental illness and religious fanaticism percolated through Maud's maternal lines back to an ancestor accused of being a witch in Puritan-era Massachusetts. Maud's father, an aerospace engineer turned lawyer, was an educated man who extolled the virtues of slavery and obsessed over the “purity” of his family bloodline, which he traced back to the Revolutionary War. He tried in vain to control Maud's mother, a whirlwind of charisma and passion given to feverish projects: thirty rescue cats, and a church in the family's living room where she performed exorcisms. Her parents' divorce, when it came, was a relief. Still, her position at the intersection of her family bloodlines inspired in Newton inspired an anxiety that she could not shake, a fear that she would replicate their damage. She saw similar anxieties in the lives of friends, in the works of writers and artists she admired. As obsessive in her own way as her parents, Newton researched her genealogy—her grandfather's marriages, the accused witch, her ancestors' roles in slavery and genocide—and sought family secrets through her DNA. But immersed in census archives and cousin matches, she yearned for deeper truths. Her journey took her into the realms of genetics, epigenetics, and the debates over intergenerational trauma. She mulled over modernity's dismissal of ancestors along with psychoanalytic and spiritual traditions that center them. Searching, moving, and inspiring, *Anchor Trouble* is one writer's attempt to use genealogy—a once-niche hobby that has grown into a multi-billion-dollar industry—to expose the secrets and contradictions of her own ancestors, and to argue for the transformational possibilities that reckoning with our ancestors offers all of us.

The Quintessential Zerka Zerka T Moreno 2013-05-13 The Quintessential Zerka documents the origins and development of the theory and practice of psychodrama, sociometry and group psychotherapy through the work and innovation of its co-creator, Zerka Toeman Moreno. This comprehensive handbook brings together history, philosophy, methodology and application. It shows the pioneering role that Zerka, along with her husband J. L. Moreno, played in the development, not only of the methods of psychodrama and sociometry, but of the entire group psychotherapy movement worldwide. It demonstrates the extent to which Zerka's intuitive and intellectual grasp of the work, combined with her superb ability to organize and synthesize, continue to exert an influence on the field. Toni Horvatin and Edward Schreiber have selected articles that span a career of some sixty years, from Zerka's very first publication to recent, previously unpublished, work. Personal anecdotes and poetry from Zerka herself provide a valuable context for each individual article. The selection includes: psychodrama, it's relation to stage, radio and motion pictures psychodramatic rules, techniques and adjunctive methods beyond aristotle, breuer and freud; Moreno's contribution to the concept of catharsis psychodrama, role theory and the concept of the social atom. This book provides a rich source of insight and inspiration for all those interested in the history, development and practice of psychodrama, sociometry and group psychotherapy, whatever their level of experience. It will be of interest to anyone involved in the fields of psychology, counselling, sociology, social work, education, theatre, or human relations.

The Last Tudor Philippa Gregory 2017-08-08 The latest novel from #1 New York Times bestselling author Philippa Gregory features one of the most famous women in history, Lady Jane Grey, and her two sisters, each of whom dared to defy her queen. Jane Grey was queen of England for nine days. Her father and his allies crowned her instead of the dead king's half-sister Mary Tudor, who quickly mastered an army, claimed her throne, and locked Jane in the Tower of London. When Jane refused to betray her Protestant faith, Mary sent her to the executioner's block, where Jane transformed her father's greedy power-grab into tragic martyrdom. “Learn you to die,” was the advice Jane wrote to her younger sister Katherine, who has no intention of dying. She intends to enjoy her beauty and her youth and fall in love. But she is heir to the insecure and infertile Queen Mary and then to her sister Queen Elizabeth, who will never allow Katherine to marry and produce a Tudor son. When Katherine's pregnancy betrays her secret marriage, she faces imprisonment in the Tower, only yards from her sister's scaffold. “Farewell, my sister,” writes Katherine to the youngest Grey sister, Mary. A beautiful dwarf, disregarded by the court, Mary keeps family secrets, especially her own, while avoiding Elizabeth's suspicious glare. After seeing her sisters defy their queens, Mary is acutely aware of her own danger, but determined to command her own life. What will happen when the last Tudor defies her ruthless and unforgiving cousin Queen Elizabeth?

The Man's Guide to Women John Gottman 2016-02-02 A great "philosopher" once said, "Trying to understand women is like trying to smell the color 9." But the fact is, men can understand women to their great benefit. All they need is the right teacher. And arguably there is no better teacher than John Gottman, PhD, a world-renowned relationships researcher and author of the bestselling 7 principles of Making Marriage Work. His new book, written with wife Julie Gottman, a clinical psychologist, and Doug Abrams and Rachel Carlton Abrams, MD, is based on 40 years of scientific study, much of it gleaned from the Gottman's popular couple's workshops and the "love lab" at the University of Washington. It's written primarily for men because new research suggests that it is the man in a relationship who wields the most influence to make it great or screw it up beyond repair. The Man's Guide to Women offers the science-based answers to the question: What do women really want in a man? The book explains the hallmarks of manhood that most women find attractive, and helps men hone those skills to be the man she desires.

Childhood Disrupted Donna Jackson Nakazawa 2016-07-26 "A groundbreaking book showing the link between Adverse Childhood Experiences (ACEs) and adult illnesses such as heart disease, autoimmune disease, and cancer--Childhood Disrupted also explains how to cope with these emotional traumas and even heal from them. Your biography becomes your biology. The emotional trauma we suffer as children not only shapes our emotional lives as adults, it also affects our physical health, longevity, and overall wellbeing. Scientists now know on a bio-chemical level exactly how parents' chronic fights, divorce, death in the family, being bullied or hazed, and growing up with a hypercritical, alcoholic, or mentally ill parent can leave permanent, physical "fingerprints" on our brains. When we as children encounter sudden or chronic adversity, excessive stress hormones cause powerful changes in the body, altering our body chemistry. The developing immune system and brain react to this chemical barrage by permanently resetting our stress response to "high," which in turn

can have a devastating impact on our mental and physical health. Donna Jackson Nakazawa shares stories from people who have recognized and overcome their adverse experiences, shows why some children are more immune to stress than others, and explains why women are at particular risk. Groundbreaking in its research, inspiring in its clarity, Childhood Disrupted explains how you can reset your biology--and help your loved ones find ways to heal!"--

Psychodrama with Trauma Survivors Peter Felix Kellermann 2000-01-01 In a world where natural, social and political disasters are a daily reality, the therapist is increasingly called upon to find rapid and effective methods of treating the survivors of trauma, including sexual abuse, torture, war-related trauma, addiction, depression and bereavement. The contributors to this book provide persuasive evidence of how psychodrama can safely be used to create paths of change for even the most severe traumatization and they also discuss the possible transmission of trauma patterns across generations. Research following World War II, neurobiological studies and other recent research into PTSD has shown that many trauma symptoms are unconscious, non-verbal, right-brained experiences which cannot be accessed through talk therapy. Psychodrama creates a place to act out unprocessed trauma within the containment of therapy, in order to stop the obsessive repetition of the past. Psychodrama with Trauma Survivors documents the impact of trauma and explores the development of treatment, providing integrated models of experiential treatment for clinicians to use. It is an invaluable resource for those interested in psychodrama and those working with trauma survivors.
