The Cumulative Book Index 1999

The Cyberunion Handbook: Transforming Labor Through Computer Technology Arthur B Shostak 2015-02-24 In his original CyberUnion, the author presented a bold plan for unions to develop a more significant role in the 21st century by adopting four strategic aids - futuristics, innovations, services, and traditions (F-I-S-T) - knit together by cutting-edge Info Tech resources. CyberUnions in Action expands on the F-I-S-T model and looks at gains and setbacks in pioneering efforts to create "CyberUnions". It highlights relevant websites, and features interviews with key CyberUnion advocates (and some critics). Shostak reviews overseas union efforts for transferable lessons, and pays special attention to the AFL-CIO campaign to ensure Labor's advances in the use of computer networks, the Internet, wireless devices, and more.

Quick Course in Microsoft Publisher 2000 Online Press, Inc 1999 Ideal for use as a self-paced training guide or for instructor-led training, this book offers to-the-point tutorials and learning exercises for quickly grasping desktop publishing basics and building proficiency.

Hit the Headlines Colin MacFarlane 2012 Hit the Headlines charts out a series of fun and inspiring, cross-curricular journalism workshops that enhance key skills and confidence in areas such as: Writing and editing. Critical assessment.

Interviewing and observation. Mental flexibility and resourcefulness. Role-playing and teamwork. This book will enable teachers of 9 – 15 year-olds to involve their students in a number of effective and well-tested exercises, games and scenarios, which will encourage them into enthusiastically seeking out and gaining further knowledge in areas such as news, journalism, social issues, IT, data assessment,

'intelligent observation', and enhanced questioning and listening. This is 'organic learning' at its best! An introduction to the theory behind the book summarises short and long term learning outcomes which your students can achieve through these methods, explaining why scenarios which feel 'real' can immerse students and inspire them to achieve greater proficiency. The author also flags up particular aspects of the book which encourage readers to read and use it systematically, as well as to take on specific challenges themselves in order to better assist their students in the writing and editing challenges it contains.

Practical photocopiable templates for many chapters are provided, which can be used as classroom (and out-of classroom) exercises, examples and solutions to exercises. Through these engrossing journalistic scenarios, students will learn how to critically assess levels of 'interest and importance' of diverse facts, and so begin to understand that report or presentation writing of any sort involves sequencing a critical balance between these two factors. Readers and users of this book can go on to customise their own scenarios, drawing on the stimulating techniques outlined to improve their students' factual writing and related thinking skills. In particular, classroom teachers in primary, middle and secondary schools and all literacy co-ordinators will find this book extremely useful, as well as students studying for PGCEs and NQTs.

Web Creation for Beginners Mr. Ahtasham Khan 2014-09-26 This book is the ultimate guide for those who are passionate about building a website but have no clue that how to begin. It not only contains recipes including HTML and CSS but, also demonstrates how to put these building blocks together to build a meaningful construction. Unlike other books, it doesn't leave you stranded at the other end (guessing what to do next) but takes you to the final milestone.
